SUMMARY

Junior Front-End Developer with hands-on experience building responsive web applications using React.js and Next.js. Worked on real projects involving API integration, data fetching with TanStack Query, and performance optimization. Focused on writing clean, maintainable code and continuously improving through practical development experience, with strong attention to UI/UX details and reusable component design.

EDUCATION

BSc In Computer Science, Obour Institutes

- Expected Graduation: 2027 | GPA: Good
- **Coursework**: Object-Oriented Programming, Design Patterns, Data Structures, Algorithms, Database, Operating Systems, System Programming, Networks, Distributed Algorithms, Cloud Computing.
- **Professional Training** | Frontend Development Diploma – Route Academy – 2026

PROJECTS

Social Media Web Application

Personal Project • January 2026 – February 2026

- Built a responsive social media web application using React.js, Next.js, and JavaScript, implementing user authentication, posts, likes, and comments through RESTful APIs, managing real-time server state with TanStack Query, and developing reusable UI components with Tailwind CSS while optimizing rendering performance and application scalability.

E-Commerce Web Application

Personal Project • December 2025 – January 2026

- Developed a full-featured e-commerce web application using React.js and Next.js, implementing server-state management and caching with TanStack Query, integrating RESTful APIs for dynamic product and cart functionality, and building reusable, responsive UI components using Tailwind CSS and shadcn/ui, while optimizing rendering performance and ensuring a scalable, user-friendly, production-ready experience.

Analytics & Management Dashboard

Personal Project • November 2025 – January 2026

- Designed and developed a responsive analytics and management dashboard using React.js and Next.js, focusing on client-side data handling and modular routing. Integrated REST APIs and managed server state with TanStack Query, implemented role-based access control and conditional rendering, and built charts, tables, and KPIs with emphasis on performance optimization, code splitting, and clean component-based architecture.

SKILLS

Frontend Development | React.js • Next.js (App Router) • JavaScript (ES6+) • HTML5 • CSS3 • Tailwind CSS • Responsive Web Design • Cross-Browser Compatibility • Semantic HTML • Accessibility (a11y)

State & Data Management | TanStack Query • RESTful APIs • API Integration • Data Fetching & Caching • Error Handling • Loading & Empty States

Backend Fundamentals | Node.js (Basics) • Express.js (Basics) • REST API Consumption • Backend Integration

Programming Concepts | JavaScript (ES6+) • Object-Oriented Programming (OOP) • Data Structures & Algorithms (Basics) • Problem Solving • Clean Code Principles

Tools & Performance | Git • GitHub • Version Control • Performance Optimization • Debugging • Code Refactoring • Browser DevTools • Lighthouse Optimization

Design & Collaboration | Figma • UI/UX Principles • Design-to-Code Workflow • Team Collaboration • Agile/Scrum Basics

Languages | Arabic (Native) • English (Good)

Authentication | NextAuth.js • JWT • Session Management • Protected Routes

VOLUNTEERING

Volunteering Experience

university

February 2024 – Present

- **Volunteered** as a Frontend Mentor at IEEE Obour Student Branch, mentoring 200+ students in updated frontend technologies including HTML5, CSS3, and JavaScript (ES6).
- **Served** as a Mentor at ICPC Obour Community, supporting 250+ students in problem-solving and competitive programming fundamentals.
- **Worked** as an Instructor & PR Member at OI Robotics Team, delivering workshops to 150+ students and leadership and communication skills.
